SUMMARY

Architected ADP's internal multi-agent AI platform, second-in-command to the Principal Architect, taking it from POC to production in under 3 months. Built a Jira agent that drafts feature tickets from Confluence context, identifies gaps in the source context, and confirms with the user before creating anything.

SKILLS

AI & Agents: Agentic, LLM, MCP, Prompt Engineering, RAG, Claude APIs, Fine-tuning

Languages: Python, TypeScript, JavaScript

Frameworks & Libraries: FastAPI, Node.js

Cloud & DevOps: CI/CD, Docker, Jenkins, AWS

Databases & Data: PostgreSQL

Practices & Tools: Observability, Jest

EXPERIENCE

Member Technical (Full Stack AI Engineer)

Sep 2023 - Present

ADP India, Hyderabad, India

Agentic AI Platform - Enterprise AI

Architected ADP's internal multi-agent AI platform · since 2025

- second-in-command to the Principal Architect on the platform
- took it from POC to production in under 3 months
- adopted by 50+ engineers across development, QA and DevOps
- feature delivery went from 3-5 engineers to 1
- feature turnaround went from ~1 week to ~1 day

Jira Agent - Autonomous Ticket Generation

Built a Jira agent that drafts feature tickets from Confluence context · since 2025

- pulls Confluence context over MCP to generate feature tickets
- identifies gaps in the source context rather than filling them silently
- confirms with the user before creating anything (human-in-the-loop by design)

Synthetic Monitoring & Production Health Checks

Set up synthetic monitoring with hourly production health checks

- Docker plus Jenkins pipeline running synthetic checks against production hourly

The Zone - CRM Sales Enablement Platform

Full-stack engineer on The Zone, ADP's sales intelligence platform

- used by ~20,000 sales reps; supports ~1M end clients
- built account prioritization, triggers, competitor insights and pre-call intelligence
- built on React 18.2 and Node 20, with Node 24 in the Docker image

Rapid Pre-Call Prep Summary Generator

Automated pre-call prep summaries for sales reps

- AWS Lambda job that runs daily
- checks for available insight summaries and posts them to users in The Zone UI

Trigger Mismatch Checker

Built a statistical dashboard detecting Salesforce/internal-DB trigger discrepancies

- surfaces mismatches between Salesforce triggers and the internal database
- statistical view rather than a per-record alert stream

PROJECTS

Vidhi - Legal Contract Assistant (RAG)

2026

Built a legal-document RAG assistant with clause classification and extractive question answering

- Gradio app with a Chat tab and an Analyze tab
- Chat retrieves clause chunks from FAISS using all-MiniLM-L6-v2 embeddings; Gemma answers grounded in the retrieved clauses and cites sources
- Analyze runs a self-trained clause-type classifier and a self-trained extractive question-answering model to produce a clause-type breakdown, extracted key fields and a missing-clause checklist

AI Data Migration Agent

2026

Built an autonomous HR-data migration agent with human-in-the-loop escalation

- maps messy HR exports to a target schema, cleans, validates and pushes to an API
- escalates only genuine ambiguity to a human, with an audit trail of every decision
- supervision web UI for reviewing and resolving escalations

Vidhi - Qwen2.5 QLoRA Fine-Tune

2026

Fine-tuned an open-weight LLM on Indian legal instructions on free-tier hardware

- fine-tuned Qwen2.5-1.5B-Instruct with QLoRA (4-bit) via Unsloth
- ran entirely on a free Colab T4
- exported to GGUF Q4_K_M for local inference with Ollama

EDUCATION

B.Tech, Computer Science and Engineering

Mar 2019 - Jun 2023

Vardhaman College of Engineering · CGPA 8.0

CERTIFICATIONS

AWS Certified AI Practitioner (2026) · NPTEL certifications in Python for Data Science, Cloud Computing and DBMS (2022-2023)

ACHIEVEMENTS

iClub nomination - ADP Highest Valued Contributor · Best Work Award, three times in five quarters · Golden Shining Star of the Year · Finalist, ADP Hackathon 2025 · LeetCode - 200+ problems solved, rating 1550 · Codeforces - rating 1450, Specialist

LANGUAGES

Hindi, English, Telugu
